- Support to build and develop markets and stronger brands
- To develop tax incentives for businesses that generate real social value
- To create a level playing field for Social Enterprises

We challenge you to look at policy and practice that supports:

- 'Social Value' to ensure it is implemented when commissioning
- A robust legislative framework aimed at unlocking social enterprise's potential. "Social Value Act"
- The Co-design and testing of new approaches to public service delivery
- Truly commissioning for social value by adding weighting to contracts
- The implementation of a robust monitoring system for managing and evaluating social clauses

Social enterprises are businesses that put people and planet first. They use their spending power to make a positive difference to the world in which we live.
